## Graettinger Building

---

# **Introduction**

Through the months of April and May at the request of the Graettinger-Terril School board, a building in grounds committee was convened. This committee consisted of 19 stakeholders in the community. These stakeholders took a tours of the Graettinger High School/Middle School building as well as the Terril Elementary building.

Each person was asked to rank each area of the building as either satisfactory or not satisfactory and provide feedback regarding those specific areas. Within this report you will find the summation of those findings.

## Building and Ground Committee Summary

### *Summary of Committee:*

*A building and grounds committee was convened in April 2016 to determine long term building projects in regards to the Graettinger-Terril High School/ Middle School and Elementary Buildings. This committee was comprised of parents/stakeholders from both the Graettinger and Terril communities.*

*The Committee was given a tour of each building and asked to make a determination as to whether each area toured was sufficient or non sufficient. Committee tours allowed for a better understanding of building strength and weaknesses. The limitations of our current facilities' and system design and organization create student safety and building security concerns.*

*Committee members were provided with comments from the teacher/staff in regards to the specific areas of the school which they work. Following the tours, each member of the committee was asked to prioritize their top three concern areas of improvement for the building.*

*The Committee was appreciative of the general updates throughout the school. They were also satisfied with the condition of most classrooms and space that was proved for instruction.*

### *Summary of Facilities Needs:*

- ❖ The Committee noted that the Gym & Athletic facilities are not comparable to other school districts and will need to be updated/rebuilt.*
- ❖ The committee noted that the current Middle School locker room facilities are outdated and were often referred to as "embarrassing."*
- ❖ The Committee noted that the Front entrance to the MS/HS building does not provide an inviting environment and safety concerns are evident based on the layout.*
- ❖ The Committee noted that the current science facilities are outdated and do not provide the space or equipment required to provide students a adequate learning experience.*
- ❖ The Committee noted that the Middle school & High School classrooms currently have materials (cabinets, cupboards & whiteboards) intended for elementary classrooms.*
- ❖ The Committee noted that the stage area does not provide an adequate space to preform musical performances.*

### *Summary of Facilities needs:*

- ❖ The Committee noted the lack of cameras throughout the MS/ HS building and felt the addition of cameras at entrances/parking lots would strengthen overall security of the school.*
- ❖ The committee noted the need for general classroom updates such as additional outlets in the rooms as well as removing old outdated equipment.*
- ❖ The committee noted a safety concern regarding the second level of the building. The Committee would like to see the addition of fire ladders/ ropes for escape purposes.*
- ❖ The committee noted the lack of cohesiveness in regards to school colors and emblems throughout the school.*
- ❖ It was apparent that the MS/ HS facilities lack storage facilities.*
- ❖ The Committee noted inconsistent heating and cooling issues at the high school/middle school must be addressed*
